

Compact 3-phase Rectifier Transformer Supplies for Servo Controllers series E1100/B1100 and E1001

Safety transformers comp. VDE 0670 part 2-6, EN 61558-2-6, EN 61000-3-2

In general

Type T01 in modern industrial design, meets national, and international upcoming regulations. It was designed bearing following aspects in mind:

- 3 power classes: 420VA, 900VA, 1500VA
- 3 input voltage versions: 3x230VAC, 3x400VAC, 3x480VAC
- optimal layout to reduce surface area
- simple mounting via open-ended slot
- compact construction and low weight
- high reliability and long service life
- low total losses

Design

Covered, stationary, for installation and set-up in dry rooms, separate windings, open-ended mounting slot integrated in cover. Connection to non tracking transformer terminals with screw connection. Terminals are protected against finger touch or contact with the back of the hand in compliance to accident prevention regulations (VBG 4).
